MEMORANDUM FOR: [REDACTED]

SUBJECT : Modifications to Moment Ordering  
and Bond Energy Programs

AT 1. Recently, [REDACTED] O/DCI, requested that a  
matrix clumping fortran program be modified so that he could  
use it. In addition, last fall a matrix ordering fortran  
program was modified [REDACTED] ST

AT 2. [REDACTED] would now like to use the outputs from  
both of these programs as inputs to OBGI/CD's SYMVU program.  
AT Would [REDACTED] therefore, please modify these two programs  
so that the user has the option of writing the output to a  
data set which can be used as input to SYMVU.

AT 3. I have already discussed this with [REDACTED] ST  
who stated he could show [REDACTED], who is modifying the  
clumping routine, what needs to be done.

AT 4. [REDACTED] would like this capability to be built  
into the two programs within the reasonable future so he  
can use it in displaying various data.

[REDACTED] ST
